## Environmental Health Problems at CMP

Solid waste  
dumping at  
CMP water  
channel

Extreme  
sedimentation

Water channel  
hydraulic flow  
reduction

Water channel  
incapacity to  
assimilate  
flood events

CMP  
neighborhood  
flooding

Large amount of  
houses not  
connected to a  
storm/wastewater  
recollection  
system

Wastewaters  
discharged  
directly to CMP

Bacteriological  
and chemical  
pollution

**PUBLIC HEALTH  
HAZARDS**

# BACTERIOLOGICAL SAMPLING

# RESEARCH OBJECTIVE

To determine the relationship between gastrointestinal symptomatology (GID) with floods events and wastewater exposure among residents (communities) living nearby CMP water channel.

# METHODOLOGY

## Design:

- Cross sectional
  - sampling type was a random cluster sampling
  - Approved by PSMHS IRB (Protocol # 111220-MR)

## Population:

- 19, 876 residents (6,031 houses)
  - CMP communities: Barrio Obrero Marina, Buena Vista -Santurce, Barrio Obrero, Parada 27, Las Monjas, Buena Vista -Hato Rey e Israel-Bitumul

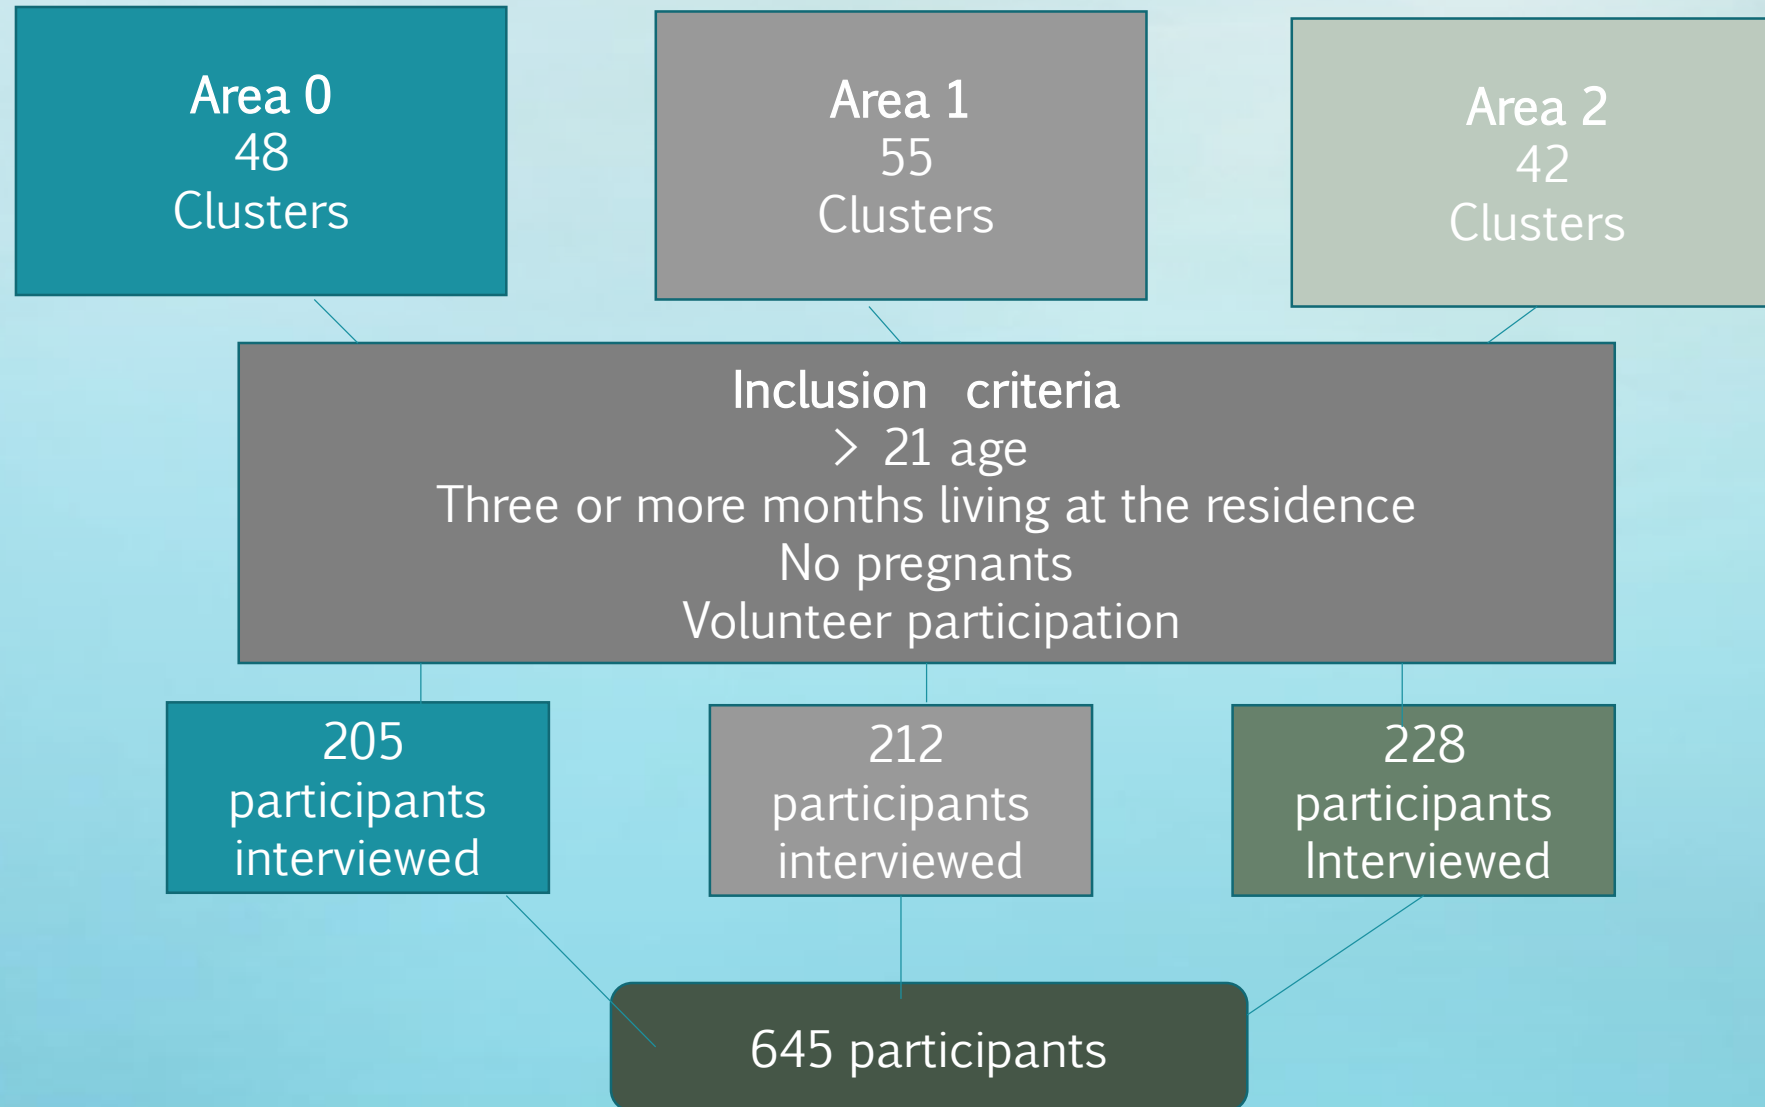

## Sample: 645 participants

Wastewater exposure: was assessed by two routes (data was obtained from Census 2000):

- floods events frequency
- connections to a sewer system

# CMP areas categories ranked from lower to higher exposure levels

# CMP areas categories ranked from lower to higher exposure levels

- **Area 0**

- Communities with a lower percentage of homes subject to flooding and a higher percentage of homes connected to the sanitary sewer
- The area was constituted by Barrio Obrero, Parada 27 and Buena Vista -Hato Rey
- The exposure level is expected to be less than the other two areas

- **Area 1**

- Communities with a lower percentage of homes with flooding issues and lower percentage of households connected to the sanitary sewer
- This area includes Barrio Obrero Marina and Las Monjas
- Intermediate exposure levels are expected

- **Area 2**

- Communities with a higher percentage of homes with flooding issues and lower percentage of homes connected to the sanitary sewer
- This area includes Israel - Bitumul and Buena Vista - Santurce
- The exposure levels are expected to be higher than the other two areas

# RESEARCH VARIABLES

GID Symptomatology during the last 24 hours	<ul style="list-style-type: none"> <li>• Three diarrhea episodes</li> <li>• 1-2 vomit episodes</li> </ul>
GID Symptomatology at least once during the last three months	<ul style="list-style-type: none"> <li>• Nauseous with stomach ache</li> <li>• Nauseous or stomach ache interfering daily activities</li> </ul>
Floods (street and homes)	<ul style="list-style-type: none"> <li>• flooded with or without a raining event</li> <li>• flooded during the past three months</li> </ul>
Wastewaters	<ul style="list-style-type: none"> <li>• Back flow (toilet, bathtub and sinks)</li> <li>• Wastewater disposal (connected or non-connected)</li> </ul>
Drinking water	<ul style="list-style-type: none"> <li>• Drinking water consumption</li> <li>• Water quality perception</li> <li>• Water uses related practices ( washing, cooking)</li> </ul>
Socio- demographics	<ul style="list-style-type: none"> <li>• Age, gender, income</li> </ul>

Data analysis: Descriptive statistics, POR, Interval of confidence (95%)

# RESULTS

# CMP Residents GID Prevalence

Prevalence of GID symptomatology (last 24 hours)	
Gastrointestinal symptomatology	n (%)
vomits	13 (2.1)
Nauseous with stomach ache at the same time	36 (5.6)
Nauseous or stomach ache impeding to perform a daily activity	109 (17.2)
3 diarrhea episodes in 24 hours	38 (5.9)

Prevalence of GID symptomatology (last 3 months)	
Gastrointestinal symptomatology	n (%)
vomits	100 (15.7)
Nauseous with stomach ache at the same time	129 (20.3)
Nauseous or stomach ache impeding to perform a daily activity	123 (19.2)
3 diarrhea episodes in 24 hours	78 (12.2)

GID definition according to EPA

## Prevalence of GID in Puerto Rico

21 %

CMP GID Prevalence  
(last 24 hours)

CMP GID Prevalence  
(last 3 months)

The background of the slide is a soft, misty landscape. It features rolling hills or mountains in the distance, partially obscured by a light mist. In the foreground, there is a calm body of water, likely a lake or a wide river, which reflects the surrounding scenery. The overall color palette is dominated by various shades of teal, light blue, and pale green, creating a serene and ethereal atmosphere. The text is overlaid on this background, centered horizontally.

# Prevalence of GID & Socio- demographics

Caño Martín Peña

Caño Martín Peña Prevalence of GID Linked to Socio- demographics  
(last 24 hours)

VARIABLE		CATEGORY	GID (%)	OR	95% IC	P VALUE
GID LAST 24 HOURS	GENDER	MALE	14.7	1.0		
		FEMALE	22.7	1.70	1.09-2.65	0.018
	AGE	21 - 49 YEARS	13.0	1.0		
		50 - 64 YEARS	27.5	2.53	1.53-4.19	0.001
		≥ 65 YEARS	19.8	1.65	0.96-2.82	
	TIME (HOURS) AT RESIDENCE (WEEKEND)	< 20 HOURS	14.8	1.0		
		> 20 HOURS	22.3	1.65	1.06-2.56	0.025
	MONTHLY INCOME	LESS THAN \$ 1000	25.7	1.82	1.32-2.91	0.056
		MORE THAN \$ 1000	33.3	1.0		

Caño Martín Peña Prevalence of GID Linked to Socio- demographics  
(last 3 months)

	VARIABLE	CATEGORY	GID (%)	OR	95% IC	P VALUE
GID LAST 3 MONTHS	GENDER	MALE	23.9	1.0		
		FEMALE	35.3	1.74	1.20-2.51	0.003
	AGE	21 - 49 YEARS	29.6	1.0		
		50 - 64 YEARS	37.1	1.61	1.07-2.41	0.059
		≥ 65 YEARS	29.4	1.13	0.74-1.73	0.57
	PAID JOB	0	35.8	1.96	1.32-2.92	0.001
		≥ 1	22.2	1.0		
	HOURS WORKED (WEEK)	≤ 20	18.0	1.0		
		21-39	31.9	2.37	1.05-5.36	0.03
		> 40	16.5	1.11	0.45-2.73	0.82

The background of the slide is a misty, teal-toned landscape. It features a calm body of water in the foreground, reflecting the surrounding environment. In the middle ground, there are dark, silhouetted mountains and a line of trees. The background is filled with soft, hazy mountains under a pale sky. The overall color palette is dominated by various shades of teal, blue, and green, creating a serene and atmospheric setting.

# Prevalence of GID & Floods

Caño Martín Peña

Caño Martín Peña (GID) Prevalence    Linked to Flooding Events  
(last 24 hours)

	VARIABLE	YES /NO	GID (%)	OR	95% IC	P VALUE
GID LAST 24 HOURS	FLOODED DURING 2011 (HOMES)	YES	22.9	1.53	1.01-2.31	0.043
		NO	16.2
